

Concrete Castles, Just a Friend

Why do you hide when your phone lights up the dark
Turning a cheek just to keep us apart
Hiding a smile i see right through you
Tell me the secrets i always knew

I don;t know what's behind these eyes
Underneath all the pretty lies
Haunting me leave me for dead

You said she's just a friend
Don't let it get into your head
I'll always love you
And i'll never replace you

Tell me that it's true
You didn;t find somebody new
Thought you're with me till the end
But you just perfectly pretend
That she's just a friend

Do you still feel her in your shotgun swat
Flying down the 405 did you about me
Broken memories clouding up your mind
I guess i;ll never mean as much but i still try

I don;t know what's behind these eyes
Underneath all the pretty lies
Haunting me leave me for dead

You said she's just a friend
Don't let it get into your head
I'll always love you
And i'll never replace you

Tell me that it's true
You didn;t find somebody new
Thought you're with me till the end
But you just perfectly pretend
That she's just a friend
