

# Concrete Castles, Just a Friend

Why do you hide when your phone lights up the dark  
Turning a cheek just to keep us apart  
Hiding a smile I see right through you  
Tell me the secrets I always knew

I don't know what's behind these eyes  
Underneath all the pretty lies  
Haunting me leave me for dead

You said she's just a friend  
Don't let it get into your head  
I'll always love you  
And I'll never replace you

Tell me that it's true  
You didn't find somebody new  
Thought you're with me till the end  
But you just perfectly pretend  
That she's just a friend

Do you still feel her in your shotgun swat  
Flying down the 405 did you about me  
Broken memories clouding up your mind  
I guess I'll never mean as much but I still try

I don't know what's behind these eyes  
Underneath all the pretty lies  
Haunting me leave me for dead

You said she's just a friend  
Don't let it get into your head  
I'll always love you  
And I'll never replace you

Tell me that it's true  
You didn't find somebody new  
Thought you're with me till the end  
But you just perfectly pretend  
That she's just a friend
