Corrosion Of Conformity, Votin' With A Bullet

The number in nations
The God in their hearts
The justice in swine
The devil in me.....vote!

This long hand that breaks our backs Still casting shadows on all that we see Unjustified...mercy killing is just a feeling To keep our numbers from being free

Prison for praise is not worth thinking Sin is still in and our ballots are shrinking So unleash the dogs - the only solution Forgive and forget, f**k no I'm talking about a revolution

The prophet man's got a needle in his hand Draws his dreams from your soul - bleeding minds into sand The year of the fear has arrived decades too late And our right to stand and fight is now solely sealed in fate

Prison for praise is not worth thinking Sin is still in and our ballots are shrinking

So unleash the dogs - the only solution Forgive and forget, f**k no I'm talking about a revolution

One last chance mission with a vision 'Cos our lives are just cards I their stack Our time is short but theirs is shorter How much longer can they hold us back

Prison for praise - the obvious answer Once had power mad - living disaster Don't f**k with me 'cos I'm on a freedom train That bears no name - this time I'm voting with a bullet

This view they once knew made our nooses too tight This justice in swine
This devil in God
So God bless my soul - I've got total control
And the crosshairs lined up dead in my sight
I'm voting with a bullet
