What you waiting for?

The madness to set in
The orchestra begins
Well you could be my love, you could be my love (you could be my love)

BREAK

Across the shining seas
you're caried on the breeze
The fiddler starts his tune, the sirens sing (?)
You could be my love

You could be my love
You could be my love
You could be my love, you could be my love

You could be my love
You could be my love
You could be my love, You could be my love

You could be my love
You could be my love
You could be my love, You could be my love
