Craig Morgan, I Got You

I've had big dreams come true and I believe in Angels although I can't see them They're watching over everything I do Ain't no easy street around the bend on my road No pot of gold at the end of my rainbow But I don't mind cause baby I got you

Chorus:

The rain keeps the flowers from dyin'
The sun lights the world when its shines
The midnight sky has a blanket of stars and the moon
And baby I got you

I can't imagine one day without you in it Life alone just wouldn't be worth livin' Love would be a wish that never came true Lord knows I've got more than I deserve But I don't question the prayers I've been answered I did something right cause Baby I got you

Chorus
