

Crumb, Carter

Take me too, i wanna be alone
take me too, i wanna be alone with you.
say you, you want to negotiate then lock my way past friend
but i'll just slip on through

disenchanted i've seen it all
i'd just hurt myself
why even get involved with you

People always think too much
They lose touch with what's up
and know how i could only try
but i'll just slip on through

a soft skull, a tiny hand
Carter didn't speak and i understand with you
say you, you want to validate then lock my way past friend
But i'll just slip on through

and as He overwhelmed me
i began to see slowly
no sound that come down
grow you

Just breathe in once you lose
