

# Crumbox, Crush The Star

Lay down your heart  
Lay down your fear  
And crush the star  
Till nothing comes of it  
It's very hard to pretend that you're not alone  
And face yourself  
With a face that you've never known

Gotta be the one  
That you never thought you could be  
Gotta see it through  
Gotta be the one  
That you never thought you could be  
Gotta see it through

Space aisles in front  
Surrounds the fear  
And share your thoughts  
Till there's nothing left of them  
Courageous hands never build you again  
So save yourself  
From the places that you've been

Gotta be the one  
That you never thought you could be  
Gotta see it through  
Gotta be the one  
That you never thought you could be  
Gotta see it through

Lay down your heart  
Lay down your fear  
And crush the star

Chorus x3
