

# Crystal Fighters, All Night

She was a wild child on the dancefloor Far away  
I was dragged to her spell  
She came to me and exposure a mystery  
What she realized, didn't say  
Who cares?  
She made me

Party all night  
Party all day  
Party all day  
/2x

She was a wind blowing to the party  
Than sent me down to the hell  
She came to my and changed my old story  
My secret love, I couldn't tell  
Who cares?  
She made me

Party all night  
Party all day  
Party all day  
She made me feel like, You can party all night  
You can, you can, you can

Will she be there when the night turns to morning?  
Be there to 15  
Up again, Up again  
Or take you down on the path of destruction  
No chance again to go to date  
Who cares?  
She made me

Party all night  
Party all day  
Party all day  
She made me feel like, You can party all night  
You can, you can, you can  
/2x
