

Cuco, Best Disaster

Take me there
I thought I was saving it
This feeling is alien
I wish I could see it all

Fading in
I see you fadin' in
I hope you're not fakin' it
Cause it feels like it's supposed to happen

This can be your favorite song
You know you're the one I'm after
We can put the world on pause
This could be our best disaster

This can be your favorite song
You know you're the one I'm after
We can put the world on pause
This could be our best disaster

This Dystopian daydream
Crumbled all my nightmares into thin air
Stop the motion of your feelings
Find your peak
'Cus it feels like it's supposed to happen

This can be your favorite song
You know you're the one I'm after
We can put the world on pause
This could be our best disaster

This can be your favorite song
You know you're the one I'm after
We can put the world on pause
This could be our best disaster

This can be your favorite song
You know you're the one I'm after
We can put the world on pause
This could be our best disaster

This can be your favorite song
You know you're the one I'm after
We can put the world on pause
This could be our best disaster
