

# Cursive, Bad Science

Moms and dads break up their gangs,  
take away their roller skates  
Give them algebra and trig  
raisins, dates, or figs  
But take away the gingerbread and cake

Every husband, every wife, every cop, every teacher  
everybody do the taking away  
every law, every curfew, ever Bible-branded textbook  
watch the kiddies do the breaking away

Moms and dads say,  
"No more hands  
no side projects, no solo careers  
no young love  
no kissing fish  
no pets at all  
no fun  
and  
I think we've had enough art, Mr. Marks."

Every molecule, every atom, every single particle  
down to the quark

Do the breaking apart!

No skateboard no swimming pools  
until you've finished your state approved chemistry,  
kid!  
Break it down to the electron and quark  
and please tell us what happens when the particles spark

Every molecule, every atom, every single particle  
down to the quark

Do the breaking apart!
