

# Dawid Podsiadło, Focus

You focus on the words I said  
Burning me up like I knew you would  
Then you're burning me up like I knew you would  
Then you're burning me up and it's all over again

You greet me in your favourite place  
Telling me it's over (you) bet I wouldn't mind and then  
Then you're burning me up like I knew you would  
Then it's all over again like I knew it would

I never loved my body  
Watching all the rest  
And then I'd look in every mirror honey  
Falling in despair  
Yes then I'd fall all around us people oh they look so well  
And then you said little darling won't you focus on your girl

I need to focus on the words you said  
We're not the centre of universe just little bugs that's it  
But it's burning me up like I knew it would  
Guess it's burning me up and it's all over again

I never loved my body  
Watching all the rest  
And then I'd look in every mirror honey  
Falling in despair  
Yes then I'd fall all around us people oh they look so well  
And then you said little darling won't you focus on your girl
