

# Deadstar Assembly, Undone

I don't know this person in front of me  
I knew you one but then you departed  
A vicious circle a lashing to your brain  
Look at you now you're back where you started  
Is this all you ever wanted  
Is this all you'll ever be  
Cause you'll get none  
And you've undone the good you've just done

Why can't you just live without the needs  
A muted blur of a life that's shattered  
A losing battle this feus within your brain  
A perfect life where nothing mattered

Everything turns to grey  
You take yourself through the pain  
You never ever see the things  
Is this all you'll ever be  
Everything's a transparency  
And you'll get none  
You're undone

You're back where you started
