

# Deep Obsession, One And Only

You are the one the one and only  
You are the only one I need  
You are the one that makes me happy  
You are the only one I need

When the night falls and heaven comes to earth  
Then all my worries suddenly return

I should have made it clear  
There's no one else for me  
You won't be alone when I get to you  
I shouldn't walk away when there's so much to say  
Oh baby understand my one and only

When I'm alone it's you who comes to mind  
When everything falls apart  
You're always right behind

My one and only  
There's no one else for me  
Yes you are the one...

One... you are the one...  
You are the one the one and only  
One... yes you are the one  
You are the only one I need  
One... you are the one...  
You are the one that makes me happy...
