

Demi Lovato, COME TOGETHER

You lead, I follow
You breathe, I feel it in my bones
The world's suspended
We fall faster than a stone

I knew the minute I met you
That I had to have you or I'd die
Hold back, I had to hold back
No way to hold me back tonight
Don't rush, I love a slow touch
And you're doin' everything just right
Hold back, you gotta hold back
You gotta hold back till it's time

Got me closer to the edge than ever
We both want it but we don't surrender
And we could make it last forever
But paradise is even better when we come together

We dance in darkness
Your hands send shivers down my spine

I knew the minute I met you
That I had to have you or I'd die
Hold back, I had to hold back
No way to hold me back tonight
Don't rush, I love a slow touch
And you're doin' everything just right
Hold back, you gotta hold back
You gotta hold back till it's time

Got me closer to the edge than ever
We both want it but we don't surrender
And we could make it last forever
But paradise is even better when we come together
Come together

Feels like the first time
Every night with you
Heaven is real life
There's nothing I'd rather do
Oh, together

Got me closer to the edge than ever
We both want it but we don't surrender
And we could make it last forever
But paradise is even better when we come
