Denison Witmer, Around Everything

I need to take a look before you go away
Before I spend my time with what I need to say
But you're so free around everyone but me

It's the city lights, and it's a New York sky
You don't want to hear, 'cause I'm not ever right
You should be with anyone but me

Then we talk around everything
We talk, talk, talk around everything

I need to hear a word before you go away
I need to hear a word before you go away
You're so free around everyone but me

And then we talk around everything
We talk, talk, talk around everything
We talk around everything
We talk, talk, talk around everything

Talk around everything
You talk, talk, talk around everything
