Diana Ross, Summertime

(Leonard Cohen/Sharon Robinson)

Summertime when will you come I wanna put my light things on I wanna put my winter life away Summertime I need a sunny day

I want those peaches on the table I want the watermelon red And the warm sun creeping through the window To ease me out of bed

I want the sand out there to lie on And the sea out there to swim So my heart can take a holiday From breakin' over him

Summertime when will you come I wanna put my light things on I wanna put my winter life away Summertime I need a sunny day

And I want to drive forever Wanna roll the windows down Get the breeze back on my body Get my feet back on the ground

I want the sand out there to lie on And the sea out there to swim So my heart can take a holiday From breakin' over him

Summertime when will you come I wanna put my light things on I wanna put my winter life away Summertime I need a sunny day
