

# Disturbed, New Disease

Now, I can take this  
Everything I know  
Realized that I'm nothing I wanted to be  
I can never change  
Anything I've done  
Because it's the only thing I have left  
Blame myself again  
For what I didn't do  
Never really knew it was coming from me  
Change the way I felt  
The worst is yet to come  
Because I have gone too far now  
Nobody, Nobody, Nobody, Nobody  
Change my mind  
And it leads me to a new disease  
Somebody, Somebody, Somebody, Somebody  
Let it die  
But it still becomes a new disease  
Today  
Is this all worth what  
This has done to me  
Water down my senses and turn them on me  
fuck morality  
And everything I know  
If I didn't hate this then I couldn't go  
Impersonate myself for what I used to be  
Denial is all that's left now  
Nobody, Nobody, Nobody, Nobody  
Change my mind  
And it leads you to a new disease  
Somebody, Somebody, Somebody, Somebody  
Let it die  
But it still becomes a new disease  
Nobody, Nobody, Nobody, Nobody  
Change my mind  
And it leads me to a new disease  
Somebody, Somebody, Somebody, Somebody  
Let it die  
But it still becomes a new disease  
Dreaming in my head  
I'm suffering instead  
I can't remember why this meant so much to me  
No! Did I ever want it?  
And I coulda been  
And I woulda been  
No! Did I ever want it?  
And I coulda been  
And I woulda been  
Conceiving in my head  
I'm suffering instead  
I can't remember why  
This meant so much to me  
Nobody, Nobody, Nobody, Nobody  
Change my mind  
And it leads you to a new disease  
Somebody, Somebody, Somebody, Somebody  
Let it die  
But it still becomes a new disease  
Nobody, Nobody, Nobody, Nobody  
Change my mind  
And it leads you to a new disease  
Somebody, Somebody, Somebody, Somebody  
Let it die  
But it still becomes a new disease

But it still becomes a new disease  
But it still becomes a new disease
