

Disturbed, Violence Fetish

Bring the violence
It's significant
To the life
If you've ever known anyone
Bring the violence
It's significant
To the life
Can you feel it?

How do you sleep
When you live with your lies
Out of your mouth
Up from your mind
That kind of thinking
Starts a chain reaction
You are a timebomb ticking away
You need to release
What you're feeling inside
Let out the beast
That you're trying to hide
Step right up and be a part of the action
Get your game face on
Because it's time to play
You're pushing and fighting your way
You're ripping it up

How do you live without playing the game
Sit on the side and expect to keep sane
Step right up and be a part of the action
Come get a piece of it before it's too late
Take a look around
You can't deny what you see
Were living in a violent society
Well my brother let me show you a better way
So get your game face on because it's time to play
You're pushing and fighting your way you're ripping it up

So tell me what am I supposed to be
Another goddamn drone
Tell me what am I supposed to be
Should I leave it on the inside
Should I get ready to play
