

# Dolly Parton, You And Me Her And Him

You and me and her and him must get together  
And see if maybe we can find a way  
To put an end to hurting one another  
Cause he don't know and she don't know how much we hurt each day

It's not fair and you and I both know it  
To have to hide and love the way we do  
The time is now that we must get together  
Her and him me and you  
[ steel - fiddle ]  
She and I had lost it long before I met you  
We tried and tried but all the love had gone  
And I guess respect is all that's kept me with him  
Cause there hasn't been no love there in so long

It's not fair and you and I both know it...  
Her and him me and you
