Doro, Like An Angel

I've had battles with the devil and it's left a scar or two why do I forget my troubles whenever I'm with you

Like an angel are you an angel you have saved my heart and you play your part like an angel to me

Yes I met you on my darkest day when my world turned cold as ice you lit my cigarette and you took me away it felt like paradise

Like an angel a real angel drown me in your light take me through the night you're an angel I have fallen from the dark above into the arms of love you're an angel - to me
