

# Downhere, Feels Like Winter

I can't say what brought me down this far  
It's complicated  
Face down and bleeding from this war  
Could you forget about figuring me out  
And be glad I made it  
From face down and bleeding from this war  
From this war, from this war

Chorus  
And it feels like winter  
On a perfect summer day  
If I convinced my heart to believe my mind  
It might just go away

I can't say the last time I really smiled  
It takes a lot now  
When you're face down and bleeding from a war  
Well I know exactly where I've been  
And I can't go there again  
I need a lot more, I need a lot more than thoughts  
I need your touch in my war

Chorus

When it feels like winter  
Would You come and save the day  
When You touch this heart  
I know You really love me  
And You'll never go away

And it feels like winter  
On this perfect summer day  
'Cause You convinced my heart to know You really love me  
It might just go away  
Might just go away
