The plane managed to land, the skeleton at the controls

A place called the Twilight Zone

Are extraterrestrials able to accomplish this?

I will explain but you'd become more puzzled at the possibilities

Earth ending trilogies, wacky stuff

Like gas passing dinosaurs

While I stroll in circles blindfolded

Gave a lady some wrinkle cream out of rat poop

You might just laugh so hard your skull cracks

Brain spills thick blood shooting out like a champagne cork

Females so horny and mean, sucking scales off of live rattlesnakes

My boy gave his girl money for groceries, she got a new hairdo

Women like this could even make the devil commit suicide

hung from a tree on Johannesburg with no parachute

Bigfoot captured by UFO's

Haloes were found, at the landing sites

Vanishing victims, kept alive on metal examining tables

Experts baffled they could survive the caustic exposure

to laser scalpels, green berets

Flowing cold heads in mechanical wombs

Radioactive constant temperature circular appendages

Cripples start shaking sending distress signals

We're not alone in the Twilight Zone

"They weaved among the trees at breakneck speed"

(Kool Keith)

Keep it simple

Back in spiral, I roast humans like a gyro

New York, Atlanta, Africa to Cairo

Diplomat King Presidential offspring

Two miles from Westinghouse, with lights down South

Government chemical voodoo man miracle

Super disease your brain is more hysterical

My urine see paralyze your ability with space codes

electrodes you're ready for a pap smear

Wax in your inner ear, doo-doo in your outer ear

Two cows a zebra will jump through your atmosphere

Giraffe-Funk will raise beamin through your trunk

Steam of Legion, to burn up in your anal region

Power contracting with bombs in his rectum factor

Utilized phonic like water in your Panasonic

Trip or slip or fall

Right into the earth pit, gamma ray toilet

Microscopes on your earth shit

Dr. Ludicrous, I turn into a octopus

Grab eight species, isolate like an incubus

Convert with probes, green shit is on your earlobes

Attack what stomach with juice they call gastric

Alien bugs with sickle cell, get they ass kicked

Dermatologists examine more black piss

Radiation butter pouring down your sinus, it's Dr. Octagon

"They weaved among the trees at breakneck speed"

Utilize to abuse minds
Slice head halves, let's probe the subconscious lobe
Mathematical parabola, ACT test and just ex-plorating
the creative arctic regions, or isolating cockpit
A regular pitstop monitoring with enough fuel to fly a small dirigible
To a place an oasis in a nebula, Earth
Universal charting unseen atmosphere
Requesting assistance, I speed through waves like a Concorde SST
Then open aperture
The shape of Octagon selects forward morphing it's the vertical Frankenstein
Prototype of like Kevorkian
Mind pedestrian controls
Spend elevation gobble the ignorant supersonic cruise
Hidin to think, focus psychosis with Von Blowford
Black lotus releases when life is flailing external
terminal update, thermal conducted power source supplied
Man on the moon pumps amps, or souped up cable boxes
getting up impossible
The speaker needs another dose, concoct
Concoct the scenario view, in a position of a coroner
describing current events bent on human dismemberment
To a point of no resemblance
We're not alone in the Twilight Zone

Like Enoch, I wear my cape, you can't destroy
my impeccable caliber that makes your vision blur
I drop particle X when having Rhythm sex
Voodoo arrangers with the kids Power Rangers
Make me see other men, gorillas masturbating with human strangers
Legally through court, you're stung by a genital wart
Chlamydia, through the city-a
Los Angeles Texas has a serpent that's urgent
for the mass appeal biomedical test your rectum
squeezing in banana peels
Outwards backwards towards Boston
It's costing androids leaving humans with hemerrhoids
Thinking more of what they can't explore, like
the cartoon Donald Duck is giving fellatio on the floor
with Reed Richards, looking at The Thing's naked pictures
Taking Ex-Lax to relax with the needle and thread
sewing up all the other buttcracks
In the industry there's no one who can mess with
Dr. Octagon, now serving coleslaw and pink pickles

Keep it simple

"Detached his bike, and leaped to safety just before they collided with a tree"
