

Dragonforce, Midnight Madness

March on, the fire in the sky
Live now, tomorrow we may die
Stand strong, desire to survive
Till the end of time

No more, you'll never walk alone
Starlight will guide us to our home
Reborn, the sands of time are sown
Till we claim our throne

Aggravation, termination,
Generations in starvation,
Mass salvation of the nation,
Now!

We will fly tonight towards the angels,
See a star shine bright into the sky
We will stand tonight and live forever
We're the masters of the stars and of all time

We will fly tonight towards the angels,
Wee a star shine bright into the sky
And we will stand tonight and live forever
We're masters of the stars and of all time

Dark clouds, the symphony of war,
Stare now into the crystal ball,
Stay strong and face a winter storm,
Till the final call

Strike now, the power from within
Hunt down, and crush them for their sins
This time the battle we will win
So it now begins

Suffocation, desperation,
Close temptation to predation,
Blind destruction of creation,
Now!

We will fly tonight towards the angels,
See a star shine bright into the sky
We will stand tonight and live forever
We're the masters of the stars and of all time

We will fly tonight towards the angels,
See a star shine bright into the sky
And we will stand tonight and live forever
We're the masters of the stars and of all time

Once lost but now we're free,
To the night we hold the key,
Silently we wait the last command,

Guardians of space and time
To the mountain we must climb
At the gates of glory we now stand,
For the final stand!

[Solo]

Whoa whoa whoa whoa whoa

We will fly tonight towards the angels,

See a star shine bright into the sky
We will stand tonight and live forever
We're masters of the stars and of all time

We will fly tonight towards the angels,
See a star shine bright into the sky
And we will stand tonight and live forever
We're masters of the stars and of all time

And on we ride!
