

# Earth, Wind And Fire, Spend The Night

Dawn Thomas

You're like no one else that I have loved before  
There's a certain something in my heart  
For the first time in my life I know for sure  
You're the love that I've been looking for

A few unsettled differences is where we stand  
With a little effort we can them out  
I just want to hold you in my arms again  
Find it in your heart to let me in

Chorus:

I want to spend the night with you  
Make love like we used to do  
Oh, I want to feel a fire within  
I want to fall in love again  
After we get through  
I want to spend the night with you

There's a full moon shining in the sky above  
Let's don't waste this night on sad goodbyes  
After all it's you that I've been dreaming of  
Let's give into making up

Chorus (repeat)
