

Ed Sheeran, Be Right Man (Equals)

A lifetime's starting to feel like it's falling short of the mark
But it's all that we got
Every teardrop
Every wrong turn
Made the moment we found
And it's coming around, around, around, around

I don't wanna miss one thing, we can turn the whole world down
And listen to the in-between, we are, we are the sound
There's nothing but the space we're in, the hurry and the noise shut out
Just stay here and be right now

The shadows cling to the ceiling
And fracture the light that lands in our eyes
Every moment changes the whole view
And just when it ends
I feel it again, again, again, again

I don't wanna miss one thing, we can turn the whole world down
And listen to the in-between, we are, we are the sound
There's nothing but the space we're in, the hurry and the noise shut out
Just stay here and be right now

Nothing else matters
Stay here and be right now
Nothing else matters
Just stay here and be right now

I don't wanna miss one thing, we can turn the whole world down
And listen to the in-between, we are, we are the sound
There's nothing but the space we're in, the hurry and the noise shut out
Just stay here and be right now
