Ed Sheeran, Be Right Man (Equals)

A lifetime's starting to feel like it's falling short of the mark But it's all that we got Every teardrop Every wrong turn Made the moment we found And it's coming around, around, around

I don't wanna miss one thing, we can turn the whole world down And listen to the in-between, we are, we are the sound There's nothing but the space we're in, the hurry and the noise shut out Just stay here and be right now

The shadows cling to the ceiling And fracture the light that lands in our eyes Every moment changes the whole view And just when it ends I feel it again, again, again, again

I don't wanna miss one thing, we can turn the whole world down And listen to the in-between, we are, we are the sound There's nothing but the space we're in, the hurry and the noise shut out Just stay here and be right now

Nothing else matters Stay here and be right now Nothing else matters Just stay here and be right now

I don't wanna miss one thing, we can turn the whole world down And listen to the in-between, we are, we are the sound There's nothing but the space we're in, the hurry and the noise shut out Just stay here and be right now
