

# Edyta Górniak, Hope For Us

I will never be ashamed  
For having loved you  
I will always wear you like my name  
You're in every breath I take  
Every promise that I make  
With every tender touch, a life can change

I will never be the same  
For having known you  
When forever comes I'll still be standing by your side  
Like the shore can never be  
As it was before the sea  
With out our hope, how can we survive?

We have faith  
We believe  
Surely there must be some  
Hope for us  
Hope for us

Another place  
Another time  
Somewhere we will find some  
Hope for us

If the world could take a moment to remember  
That the love inside is all we need to live  
Then when all is said and done  
There'd be hope for everyone  
The greatest gift all we have to give

We have faith  
We believe  
Surely there must be some  
Hope for us  
Hope for us

Another place  
Another time  
Somewhere we will find some  
Hope for us  
Hope for us

Somewhere there's a place with hope for us  
Somewhere there's better place I know for us  
Somewhere there's place with hope for us

Every night  
Every day  
If your soul can lead the way...

If the world could take a moment to remember ...
