

# Edyta Strzycka, After All (Eurovision 2017 Poland)

I gotta breathe in  
I feel foolish and broken again  
You left me in pieces  
I tried to consist myself  
But I can't  
You said I'm trouble  
Now I gave back my troubles to you  
I'm like, whatever  
There's no reason for me to explain

After all we've been through  
No, I'm not gonna go back to you  
After all you've just done  
Don't you think I'll be your number one  
After all we've been through  
No, I'm not gonna go back to you  
After all you've just done  
You are not only one

Me in the mirror  
My heart steams through the glass in your jail  
I've got the fever  
Burning up my emotions like a flame  
Cry me a river  
Like I did when I crushed my own faith  
I don't want be better  
Cuz you think I 'm the part of your plan

After all we've been through  
No, I'm not gonna go back to you  
After all you've just done  
Don't you think I'll be your number one  
After all we've been through  
No, I'm not gonna go back to you  
After all you've just done  
You are not only one

Because I'm sick your in my dream  
Because it was wrong address love

After all we've been through  
No, I'm not gonna go back to you  
After all you've just done  
Don't you think I'll be your number one  
After all we've been through  
No, I'm not gonna go back to you  
After all you've just done  
You are not only one
