

Eli Young Band, Drive Away

I saw the sun set low on that skyline
Day was gone I was out of time
As I let her walk out and say goodbye
And I sat there on that street askin' why
I let her drive away....
I let her drive away....

She walked out that door threw that truck in gear
I'm standing there alone drowning in my tears
Watched the taillights as they disappeared
She was gone like I'd always feared
As I let her drive away....
I let her drive away.....

I sometimes think about her and what we had
Everything about us was not that bad
Wish I had done things different then she'd have stayed
But I let her drive away.....
But I let her drive away.....

Every time I look back I can almost see
That mountain of regret overcoming me
That night she left stays in my memory
I never thought she would ever leave
And drive away.....
I let her drive away.....

I sometimes think about her and what we had
Everything about us was not that bad
Wish I had done things different then she'd have stayed
But I let her drive away.....
I let her drive away.....

I sometimes think about her and what we had
Everything about us was not that bad
Wish I had done things different then she'd have stayed
But I let her drive away.....
I let her drive away.....
I let her drive away.....
