

# Elton John, There Is Still A Little Love

There is still a little love left for me in your heart  
Even though it seems to you that we are far apart  
You can turn your eyes to other guys, ignore me on the street  
But don't forget it's bound to show if we should ever meet

And there is still a little love left for me in your heart  
You can use a little love to make a brand new start  
For no matter how you try

you just cannot deny  
There is still a little love in your heart

But you're far too proud to say what's on your mind  
I can read you like a story book, do you think I'm blind  
For every place I seem to be, you seem to be there too  
Standing in the wings of love and waiting for your cue
