

Elysa, Bad Philosophy (Estonia - piosenka na EU)

I don't wanna be a runaway
Where the lines have faded out
I've seen too many road kills
And drifters walk about

But Oh When I turn, You turn with me
But Oh when I burn, You burn with me

Our love is like a bad philosophy
That came over you, came over me
We went too far from our reality
Oh baby we were always meant to live
A bad philosophy

I followed you blindly
When you told me you know the way
Everybody tried so kindly
To warn me not to stay

But oh I thought that we'd be here until the light fades into dark
And oh I never really cared too much going back to the start

Our love is like a bad philosophy
That came over you, came over me
We went too far from our reality
Oh baby we were always meant to live
A bad philosophy

And then you open up the door
Do you want me to come on in ?
But if you want something much more
I will turn around and leave again

Our love is like a bad philosophy
That came over you, came over me
We went too far from our reality
Oh baby we were always meant to live

Our love is like a bad philosophy
That came over you, came over me
We went too far from our reality
Oh baby we were always meant to live
A bad philosophy
