Embraze, The Sun Loves the Moon

She is cold like water She is dark like night She fears love and Looks for pain I cry with the trees I sing with the wing I am the child of moonlight I am the child of doom She loves the moon Like I used to do She loves the moon Like the day loves the night Like the sun loves the moon and The call of the wild fills her heart I can't live without my life I can't live without my soul and I am looking for you every autumn night My life didn't begin untill I saw your face Why have you not come back to me? She loves the moon Like I sed to do She loves the moon Like the day loves the night Like the sun loves the moon and The call of the wild fills her heart
