

Empires, Spit The Dark

If hope is a dangerous hole, will you join me?
Jump, there's a world of war, will you join me?
Eyes closed for lives to open up, to open up
Free fall with me to open up, to open up

I will guide you in the night, I will guide you in the night
I will guide you in the night, I will guide you in the night

Love is best an allusion
Since time is so short, jump with confusion
Eyes closed for lives to open up, to open up
Free fall with me to open up, to open up

I will guide you in the night, I will guide you in the night
I will guide you in the night, I will guide you in the night

Who do you want to forget, want to forget?
Who do you want to forget, want to forget?

I will guide you in the night, I will guide you in the night
I will guide you in the night, I will guide you in the night
I will guide you in the night, I will guide you in the night
I will guide you in the night, I will guide you in the night
I will guide you in the night
I will guide you in the night, I will guide you in the night
I will guide you in the night, I will guide you in the
I will guide you in the night, I will guide you in the night
I will guide you in the night
