Enrique Iglesias, I Will Survive

You like to think that you'll be the only one who understands me with it And you tell everyone that I can't live without you even for one day But who gave you the right to talk about the way I feel so deep inside Now I realize you were never mine, you were never right Baby you will find I will survive I'm gonna make it through Just give me time I will get over you I will survive No matter what you do Just need to see I will get over you Cause baby we'll survive Cause baby we'll survive

What makes you think that I don't see the way you made a fool of me To laugh behind my back ??
Now I realize you were never mine, we were never right Baby you will find I will survive I'm gonna make it through Just give me time I will get over you I will survive No matter what you do Just need to see I will get over you Cause baby we'll survive

I will survive I'm gonna make it through I will survive I will get over you Cause baby we'll survive
