Entwine, Closer (My Love)

closer my love veil me with your warmth oh how afraid who we are i hold my breath i try to hide my pain here in your embrace so this pain would be gone

this time i want you to dry all your tears as we make...

love...for the last time replace your heart with mine... deep inside please stay with me through the night

i rinse my face with your tears too many tears for the end darling, please, don't you cry you hold your breath you try to hide your pain here in my embrace so this pain would be gone

this time i want you to dry all your tears as we make...

love...for the last time replace your heart with mine... deep inside please stay with me through the night... for the last time replace your heart with mine... deep inside please stay with me through the night

fly without sorrow in my dreams we meet again for you i live, i would die for you you'll stay deep inside my heart
