

Erasure, Angel

See how much you mean to me
you're my electric symphony in blue
Just one look in your eyes, maybe I was hypnotised by you

You told me on the telephone of a picture so serene
And the beat goes on, feels like a fever burning &&& I say

Yes to your love &&& there's no secrets
high &&& ascending, delving deeper
fly like an angel wings unfurling
fanning the flames of love eternal

All around the world the love will manifest itself in special ways
up there on the shelf in spiritual or sexual relays

I want you yeh I crave you, I need you next to me
Locking the lip-sync on a rocket to red hot love perfection

Here we go round &&& there's no secrets
high &&& ascending delving deeper
under the water clear as crystal
spinning around n giant circles
fly like an angel wings unfurling
fanning the flames of love eternal

You say, &&&"Reach me I'll be your deity, come &&& touch me make it real
Turning the charm full on sending me into excitation

Here we go round no room for secrets
high &&& ascending delving deeper
love is resounding clear as crystal
spinning around in giant circles

Our message is love &&& there's no secrets
ever evolving heavenly creatures
fly like an angel wings unfurling
fanning the flames of love eternal
