

# Eric Saade, Boomerang

I think I need rehab from you  
Cause you are addictive

Slowly you're breaking me  
So I'm done with a treatment

You back for my heart  
Wearing it out  
But I can never predict it.

You don't care what I say  
You keep poisoning me

She's the baddest I know  
The hottest in town  
Didn't know when I say I lose her

I've been feeling for more  
Cause baby I drown  
I guess I'm right back to the future, future oooh

I fight for your love everyday  
You're like a drug with the smile on your face  
When I wake up, you gone with no trace  
Now I'm messed up, like a hangover babe.

Said that I never come back again  
But I'm right back like a boomerang

Bite in your lips, just right  
In your Victoria's Secrets

Girl you're a first class flight  
But it's a curse that you gifted

The more I resist the taste of your kiss  
The more I'm in love with your kisses.

It feels like you're in my veins  
And it's torturing me

She's the baddest I know  
The hottest in town  
Didn't know when I lose her

I've been feeling for more  
'Cause baby I drowned  
I guess I'm right back to the future, future, oooh

I fight for your love everyday  
You're like a drug with the smile on your face  
When I wake up, you gone with no trace  
Now I'm messed up, like a hangover babe.

Said that I never come back again  
But I'm right back like a boomerang

I know you're not the one to blame  
And I gone, never want you to change

I said that I never come back again  
But I'm right back like a boomerang.

I fight for your love everyday

You're like a drug with the smile on your face  
When I wake up, you gone with no trace  
Now I'm messed up, like a hangover babe
