

Face Down, Machine

Welcome to the lines
Of the meat production chain
Meat survival's down
Plague death from the disease
Still the meat procreates
Adds bodies to the flames
Lifesex it hungers on
Too hungry for release
This serpent devours Eden
Hormonal venom relief
Meat production relentless
Virgin survival instinct
The last porno hero Adam
And anorexic sister Eve
And the serpent it f**ks on
Like an erect man-made machine

I will survive
Lifeblood contradiction
Death's found a way into your veins
Our very nature sanitizes
Genocidal clean
Carnivorous immortal urges
Grinding gears, oil stained
Meat is now the serpent
And man is still machine

Final carnal conviction
Future sentence restrained
Killer/victim made you cum
And join the new food chain
Death instantaneous
But it makes you suffer through the race
Find faith until your power's gone
Ten new machines in your place
