

Fair Weather Friends, Fly By

I am not able to loose my bonds with atmosphere
I fall down from the sky
It speeds up the rhythm and drive me insane
I fall down from the sky

I spin around, wave my hands and I shout
I fall down from the sky
Had a choice about visibility
But I dived thru the clouds

If You are not ready for the crash you better let me know

So many days and so many hours
I am like a bullet shot in the sky
I must confess I don't even know what's planet and who's inhabitant

All humanity dance that weir dance
So I do my twists and turns
I'm hanged-over or rather I am fly by
I fly down from the sky

If You are not ready for the crash you better let me know

Better let me know...
