

Fismoll, Let's play birds

Come on look to into the expanse
And breath all these around
Come on don't be afraid to look
Don't be afraid to look at distance

And I hope some where you hear me still
Wherever you are, whatever you feel
And I hope some you hear me still

Come please close your eyes now
Please close your eyes and open your mind
And please don't look at me now
And feel the sky on your hands

And I hope some where you hear me still
Wherever you are, whatever you feel
And I hope some where you hear me still

Come take my arm and jump on my back
Come let's play birds all our lives
Come on, don't be afraid of gravity
Because it's all for us, for you and me

And I hope some where you hear me still
Wherever you are, whatever you feel
And I hope some where you hear me still (x2)
