

# Flat Black, Halo

So much suffering  
Everyone sees by now  
Where you want to be  
Another face in the crowd

Craving more  
Just before  
Sending a proof of life  
Your own reasons  
To be alone on the edge of a knife

Bury it all when you burn it away  
Carry the flaw, every word that you say  
Weathering faster underneath your halo

Building your walls like a fortress you made  
Don't wanna belong like it's better this way  
Weathering faster underneath your halo

Cold supremacy  
So much wasted time  
You never thought it would be like this  
You never wanted to try  
You've got your own reasons  
To be alone on the edge of the knife

Bury it all when you burn it away  
Carry the flaw every word that you say  
Weathering faster underneath your halo  
Halo  
Building your walls like a fortress you made  
Don't wanna belong like it's better this way  
Weathering faster underneath your halo

Bury it all when you burn it away  
Carry the flaw every word that you say  
Weathering faster underneath your halo  
Halo  
Building your walls like a fortress you made  
Don't wanna belong like it's better this way  
Weathering faster underneath your halo  
Underneath your halo
