

# Flume, Hollow (feat. Emma Louise)

Now I got you on my side  
We could start an empire  
You me and the sky line  
Riding on a beam light

Lift me till I'm up high  
Time fly and I glide by  
Real life high light  
Now we're Dancing on a fine line

And you make me wanna look twice  
To see Devine in my life  
Crystals on the front line  
Trust you with my whole life

And you make me wanna look twice  
To see what's on the inside  
Halo under your eyes

Wherever you may go  
Part of me follows  
Bound by no ropes and ties  
I got you for one night  
Look twice look twice look twice look twice

When I am hollow  
And I miss you and I feel like  
I've got no level  
And I miss you and I feel like

Now my light is amplified  
See I got you on the good side  
Love be my guide  
Flying through the Divide

And you make me wanna look twice  
To see Devine in my life yeah there's  
Crystals on the front line  
and I Trust you with my whole life

And you make me wanna look twice  
To see what's on the inside there's a  
Halo under your eyes

Wherever you may go  
Part of me follows  
Bound by no ropes and ties  
I got you for one night  
Look twice look twice look twice look twice

But When I am hollow  
And I miss you and I feel like  
I got no level  
And I miss you and I feel like

I've got some feelings of fire  
I've got some sense of desire  
Feelin a light just in light of  
The fact that we are alive

I'm on my way  
Changing up lanes  
Fly through the gates  
Moneys on me

I see your real  
I see your fear  
I see you clear

When I am hollow  
And I miss you  
And I feel like  
I've got no level  
And I miss you and I feel like
