

# Focus, Moving Waves

Moving waves, the wind has left you  
And you're still in commotion?  
Moving waves, the wind has left you  
And you're still in commotion?

We are still repeating the word it has taught us  
It moves our whole being into ecstasy

Waves, why do you all become excited  
And then all calm together?  
Because behind our individual action  
There is one impulse working  
Because behind our individual action  
There is one impulse working

Rising waves...what motive is behind your impulse?  
What motive is behind your impulse?

The desire to reach upwards!!
