

# Foster The People, Best Friend

When your best friends are strung out  
You do everything you can cause you never gonna let it  
Get em down  
And you find me all around, yeah!  
It comes in waves, but its hardest from the start

We've been sleeping in the field again  
I can feel, I can feel, I can feel it's beginning to end  
Yeah, premonitions smiling in the dark  
Well I can see, I can see, I can see the stories starting to arch

And time I've been a smoking word,  
I've been a river bed,  
I've been a rapid force  
And let it flow out from within  
Sometimes it feels like I only dream in black and white  
And color so

When your best friends are strung out  
You do everything you can cause you never gonna let it  
Get him down  
And you find me all around  
You say its what you need and hide your eyes when you're close to me  
When you feel like you're in the clouds  
Well it comes in waves, but its hardest from the start

Waves and feathers slipping into dreams  
I can feel, I can feel, I can feel, the celestial beings  
Wilted pleasures leave you with a breath  
I can see, I can see, I can see, the beauty in the madness

At times I've been a river bed, I tried to salt my wound  
I carry more than I can  
I feel I got a lot to prove  
Sometimes I feel I only dream in black and white  
But color so

When your best friends are strung out  
You do everything you can cause you never gonna let it  
Get him down  
And you find me all around  
You say its what you need and hide your eyes when you're close to me  
When you feel like you're in the clouds  
You oughta know, that I'm here no matter where you wanna go  
When your'e hanging upside down  
Well it comes in waves, but its hardest from the start

I am here  
No matter where you are  
Waiting here  
Open up, no matter where you are  
Seems like you had to go  
It passes by like a satellite, a star  
No matter where you are

That's how you know who your best friends are somehow
