

Foxes, Youth

They didn't want me
When I was running wild
Dragons breathing fire in the backyard at night

We live in circles
And it's so hard to breathe
Maybe the same old fears
What have we here
Don't bring me back

With you

Now I'm just chasing time with a thousand dreams
I'm holding heavy
And as we cross the line these fading beats have all been severed
Don't tell me our youth is running out
It's only just begun

If I asked you for good news
Would you smile and turn away
It's like a bad dream that is too afraid to wake

There are many among us
And we're changing all the time
Maybe the same old fears
What have we here
Don't bring me back

With you

Now I'm just chasing time with a thousand dreams
I'm holding heavy
And as we cross the line these fading beats have all been severed
Don't tell me our youth is running out
It's only just begun

These fading beats
These fading beats

Now I'm just chasing time with a thousand dreams
I'm holding heavy
And as we cross the line these fading beats have all been severed
Don't tell me our youth is running out
It's only just begun

These fading beats
A thousand dreams

These fading beats
A thousand dreams

It's only just begun
