

G-Eazy, Hate The Way (ft. blackbear)

Yeah, I hate the way, the way i always miss you
Yeah, i know i am crazy, but you're sick too
Even after everything we've been through
Though i was the one with all the issues
And every time i leave , it's too long
And every time i leave , it's all wrong
I hate the way, the way i always miss you
I hate the way, the way i always miss you

Made a promise to myslef, a promise i should stick to
Talkin' to myslef, i sais i promised i would quit you
I've been trying to let go, but it's powerful, it grips you
First, you think you got control until i see youu
Can't resist you
Know i got my issues, some i won't admit to
No one's got the answers
Everybody wants to fix you
Got this magic 8 ball, but i ain't got no crystal
Just don't fall in Courtney Love
And don't go Cobain with no pistol
It don't take a psychic or a scientist to know that
Then wjy the fuck the minute i see you
I always go back
The definitione if insanity is
Yeah, i know that
I had a hundred chances to move on, i always
I always blow that
I can't seem to find out what's the issue
See your face ob. my Explore and then i miss you
Yeah, i said I was finishing fucking wit' you
I sais i hate the fucking way i always

Yeah, I hate the way, the way i always miss you
Yeah, i know i am crazy, but you're sick too
Even after everything we've been through
Though i was the one with all the issues
And every time i leave , it's too long
And every time i leave , it's all wrong
I hate the way, the way i always miss you
I hate the way, the way i always miss you

Lie to myself every time I say that I'm done with you
Every day without you passes slower than one with you
Two days pass, it's feelin' like a week, this shit is stressful
I swear all these helpin' hands ain't even helpful
Wishin' i was closer ro you
Wish you wasn't distant
Wishin' i was with you
Still wish you wasn't distant
Wshin' we could traver back in timw and we could switch it
All this pain, wishin' it was something that could fix it
Medicate myslef, different substance, i mix it
Set my limits, try to draw the ine and then she sniffs it
Never lied, i give you my word and then you twist it
Fights outside the club
I think the paparazzi
think the paparazzi flicked it
think the paparazzi flicked it
still can't seem to find out what's the issue
hate the wat tyou talkin' whne you with your froiends, too
they don't know about the shit we've been through
i said i hate the fucking way i always

Yeah, I hate the way, the way i always miss you

Yeah, i know i am crazy, but you're sick too
Even after everything we've been through
Though i was the one with all the issues
And every time i leave , it's too long
And every time i leave , it's all wrong
I hate the way, the way i always miss you
I hate the way, the way i always miss you
