

# Ghost Of The Robot, Vehicles Shock Me

So you caught me all alone  
Did you think I'd care at all?  
Now I'm sitting by the phone,  
Waiting for you to call.

It rang a million times before I picked it up  
I wear a stupid smile saying now I'm stuck  
The effervescent beauty of her face, so thin,  
All these stupid questions, well they did me in.

Who was I to think to tell?  
You drove a 2-0-0h?  
Fake plastic trees are dead,  
Have a good time when you fall.

It rang a million times before I picked it up  
I wear a stupid smile saying now I'm stuck  
The effervescent beauty of her face, so thin,  
All these stupid questions, well they did me in.

Everything is upside down  
Everything is over now

It rang a million times when you lied to me  
It rang a million times when you lied  
It rang a million times  
It rang a million times oh  
It rang a million times  
It rang a million times

It's your birthday and I'm not there  
Because you don't even know I'm here  
Fake trees you plant behind you  
When it's me there right here beside you.  
I'm the shade that creeps your shoulder  
Why let's hide your face from me now.

Can't get over  
Can't get under  
Can't get round or through to you I...  
Can't get over  
Can't get under  
Can't get round or through to you  
Everything is over now.
