

# Glenn Tipton, Walls Cave In

They pound their fists  
Upon your door  
They want your blood  
And you know what for

You tried to say  
You got suckered in  
Each new excuse  
Is wearing thin

Suddenly out of the blue  
You changed your colours now  
Look at you

You don't talk so loud  
Now your luck's run out  
You got to the top and  
There's no way down

Oh! you better stay alive  
But you are running out of time

Just when you think you'll win  
Well think again - the walls cave in  
Oh! you thought you'd won the fight  
And then - the walls cave in

Just you and me  
And me and you  
Face to face  
Are gonna see it though

You're gonna choke and they broke your will  
And their moving in now  
They sense a kill

Your gonna lose  
You got it wrong  
So don't pretend to sing  
A different song

You're under attack  
And the odds are stacked  
And there's no escape  
There's no way back

You're always gonna lose  
Too late - you had your chance to choose

Just when you think you'll win  
Well think again - the walls cave in  
Oh! you're gonna pay the price  
And it's down to just me and you

Oh! the bigger that you are  
They say the harder that you fall

Just when you think you'll win  
Well think again  
The walls cave in

When you got a grip on victory  
Just let it slip  
Just as you think that you

Will take the prize  
You always lose  
Oh! when you think that you will win  
The walls cave in
