

Goldfinger, Time

There's no time for all of us to keep it going
There's no time at all
There's no time you can't stop your mind from growing
There's no time at all
Excuses like the world is turning
Visions of a tree that's burning
Deny the thing that makes your heart beat now
What is war worth fighting to?
When the only thing worth keeping score is how you have to prove that you are right
Blind with pride
There's no time for all of us to keep it going

There's no time at all
There's no time you can't stop your mind from growing
There's no time at all

If we are only passing through
And if we act the way we do
What is there to leave the innocent?
I believe we need a change, protect the life we rearrange
And write a brand new book's to call our own
Not blind with pride

Poisoning the world
Kill it all for profit and gain
We want it back and we want you out
So take your lies and get out of the way
Get out of the way
Get out of the way
