When the .. striped by  
And the skies are dark white  
... hit the ground  
And they take fly

Little one long cry to the winter  
I know you cold for a little one  
See the mist in the distance linger  
And your smile

When you smiling  
Everything's all right

Look me at with the cool breeze  
My head hide in the white lights  
I know I pick up pace when I take leave  
Another look in your eyes

Just us when the dusk raising  
So keep close when the cold bites  
Are you wanna keep on holding?  
And your smile
